

Grampa's Browns Corner ***Daily Blab* 4-5-20**

Hello campers. Slow news day. Only two pictures for you. I finished Nana's window box installation on the screen porch. Zippers at both sides let you close it to keep the bugs out or open it to tend the flowers.

It's hard to see the string but there is a string to raise the batten and hold it op.

I enjoyed the day. Weather was nice and I cleared the first 200 feet of the tractor path around the perimeter. I lost some time because a cotter pin on the mower deck mount got pulled out by tangles of smilax vines.

As a result the tension arm for the left side of the mower deck came loose. Also the rubber tire on one of the mower deck wheels became partially dismounted.

It took me a couple of hours to fix it right so I lost some production time. I enhanced the dam and I expect to have something to show you tomorrow. I'm quite tired so I think I'll pack it in.

Good night campers. Sleep well.
