

## **Grampa's Browns Corner Daily Blab**

Good Morning, y'all. Yesterday while building the road to Tyler Bridge I had a couple of experiences with tools falling off or out of the tractor. I decided to take time to make a tool rack mounted on the roll bar. Probably hard to see but it's holding a shovel, a rake, and a pitchfork. In the basket is wire cutter, pruning shear, and axe.

The first task on the bridge project was offloading the steel from the roof rack. If you asked me how I was going to do that, I would have said, "Very carefully".

Actually the loader on the tractor is very good for that. But you still have to be very careful.

Until I unloaded the steel I was not sure if I would paint it. Since it was demo steel taken from some building, there were some scratches and dings so I decided to go ahead and paint. But first I had to pressure wash it.

It was a lovely day. While the steel was drying, I pressure washed the mud and crud off the tractor. By late afternoon, all four beams were painted with bright red Rust-Oleum enamel.

While the paint dried I did some work on a couple of new flower beds. I'll tell you about that another day.

Time for dinner. Zoe, thanks for the reply. Can you identify the turtle?

Good night Campers.

Love, Grampa
